

Subject: Request for Installation of Fans and Chairs in Corridor and Liquid Soap in Toilets.

Dear Admin of NUML Karachi

I hope this message finds you well. I am writing to bring to your attention a few suggestions regarding the amenities within our premises that I believe would greatly enhance the comfort and convenience of all occupants.

Firstly, I would like to request the installation of fans in the corridor areas. As you may be aware, the corridor spaces can become quite warm and stuffy, especially during the hotter months. The addition of fans would help to improve air circulation and create a more comfortable environment for everyone passing through these areas.

Secondly, I propose the installation of chairs or seating arrangements in the corridor. This would provide occupants with a place to rest or wait comfortably, particularly during busy periods or while waiting for appointments or meetings.

Lastly, I suggest replacing the traditional bar soap with liquid soap dispensers in the toilets. Liquid soap offers a more hygienic and convenient option for handwashing, reducing the risk of cross-contamination and ensuring that occupants have access to adequate hand hygiene facilities.

I believe that implementing these suggestions would contribute to the overall well-being and satisfaction of everyone within our premises. I kindly request your consideration of these proposals and look forward to discussing them further.

Thank you for your attention to this matter.

Sincerely,

Students of BS Computer Science
